

ARATI THORAT

Entry-Level Software Developer

📍 Kopergaon | [+91 9699369743](tel:+919699369743) | thoratarati96@gmail.com | [Linkedin](#)

Career Objective

To obtain an entry-level Software Developer position where I can apply my knowledge of OOP, Data Structures & Algorithms, and SDLC, along with web and mobile application development, to build efficient software solutions and enhance my technical skills.

EDUCATION

Sanjivani College Of Engineering

Bachelor of Technology (B.Tech) in IT

06/2023 - Present

CGPA – 8.5 / 10

TECHNICAL SKILLS

Programming Languages- Java, Python, C

Core Concepts- Data Structures and Algorithms, Object-Oriented Programming (OOP), Problem Solving, Debugging

Web Technologies- HTML, CSS, JavaScript, React.js, Angular, TypeScript, Tailwind CSS

App Development- Kotlin, Android Studio, Firebase, Jetpack Compose

Database- MySQL, MongoDB

Backend & Framework - Node.js, Express.js, PHP, JDBC, REST APIs

Version Control & IDEs- Git, GitHub, Bitbucket, Jira, Eclipse, VS Code

PROJECTS

Web — E-Commerce Website | MERN Stack

07/2025 - 10/2025

- Designed and developed a full-stack E-Commerce web application with a modern responsive UI, Google Authentication, Razorpay payment gateway, and a role-based Admin Dashboard.
- Implemented core features including Add to Cart, Checkout, Order Management, real-time inventory updates, and secure user authentication, ensuring seamless performance across mobile and desktop devices.

Android Application — WhatsApp Clone | Kotlin, Java, Firebase, Jetpack Compose

02/2025 – 06/2025

- Developed an Android WhatsApp Clone using Jetpack Compose, implementing chat lists, status updates, call history, search functionality, bottom navigation, and floating action buttons.
- Integrated Firebase Authentication and Realtime Database for secure login, user data management, and real-time message synchronization, applying debugging and performance optimization techniques.

Web — Vehicle Tracking System | PHP, MySQL

01/2025 – 05/2025

- Built a Vehicle Tracking Web Application using PHP, MySQL, JavaScript, and Google Maps API to enable real-time location tracking.
- Implemented features such as trip history analysis, emergency SMS alerts, and admin-user management, focusing on database design, API integration, and real-time data handling.

Android Application — SAI FABRICATION | Kotlin, Firebase

07/2024 – 12/2024

- Developed an Android application for Sai Fabrication to streamline design selection and management processes.
- Implemented two modules: an Admin App for uploading and categorizing fabrication design images, and a Client App for browsing and selecting designs, using Firebase for data storage and authentication.

CERTIFICATION & ACHIEVEMENTS

- Programming in Java– NPTEL
- Python Programming– NPTEL
- Android Development– LinkedIn Learning
- Full Stack Web Development– Udemy
- Artificial Intelligence Fundamentals– IBM SkillsBuild
- AWS Academy Cloud Foundations– AWS
- Unstop Talent Park Round 2– Runner Up
- TCS CodeVita Season 13– Cleared Round 1 and Round 2
