Objective

Motivated and detail-oriented Information Technology student with strong knowledge of Java, Core Java, Object-Oriented Programming, and Data Structures & Algorithms. Passionate about building scalable backend applications and solving real-world problems through software development. Seeking a Software Engineering opportunity to apply my Java development and problem-solving skills in a growth-oriented organization.

Skills

Java, Core Java, Object-Oriented Programming (OOP), Data Structures & Algorithms, Spring Boot, Git, GitHub, REST APIs, MySQL, HTML, CSS, JavaScript, React, Node.js, Express.js, MongoDB, Problem Solving, Analytical Thinking, Team Collaboration

Projects

Java — Smart Route Optimization System | *Java, Dijkstra Algorithm, Graphs, MySQL*  **02/2026 – 05/2026**

- Developed a Smart Route Optimization System using Java and Graph algorithms to calculate shortest and most efficient travel routes.
- Implemented Dijkstra's Algorithm, BFS, and Priority Queues for optimized pathfinding and traffic-aware navigation.
- Designed data structures for graph representation and integrated MySQL for route and location data storage.

Java — Hostel Management System | *Java, Spring Boot, MySQL, REST APIs*  **01/2026 – 03/2026**

- Developed a Hostel Management System using Java and Spring Boot to manage student records, room allocation, attendance, and fee management.
- Implemented REST APIs, CRUD operations, MySQL database connectivity, and role-based admin functionalities.
- Applied Object-Oriented Programming concepts and Git version control for efficient backend development.

Java — Browser Search History Analyzer | *Java, JDBC, File Handling, MySQL*  **11/2025 – 12/2025**

- Built a Java-based application to analyze browser search history and generate usage insights using file handling and database operations.
- Implemented keyword frequency analysis, search categorization, and user activity tracking features.
- Used Java Collections Framework, JDBC, and MySQL for efficient data storage and processing.

Web — E-Commerce Website | *MERN Stack*  **07/2025 – 10/2025**

- Developed a fully functional E-Commerce Website with a modern UI, Google Authentication, Razorpay integration, and a complete Admin Dashboard.
- Implemented features like Add to Cart, Checkout, Order Booking, real-time stock updates, and responsive design for both mobile and desktop.

Web — Vehicle Tracking System | *PHP, MySQL*  **01/2025 – 05/2025**

- Built a full-featured Vehicle Tracking Web Application using PHP, MySQL, JavaScript, and Google Maps API.
- Implemented real-time vehicle tracking, trip history analysis, emergency SMS alerts, and admin-user management.

Achievements

- Solved 600+ Data Structures and Algorithms problems on LeetCode using Java with strong focus on problem-solving and logical thinking.
- Achieved LeetCode Contest Rating of 1523.
- Achieved Global Rank 2841 in TCS CodeVita Season 13 coding competition.

Certifications

Programming in Java – NPTEL
AWS Academy Cloud Foundations – AWS
Full Stack Web Development – Udemy
ServiceNow Virtual Internship - AICTE
Python Programming – NPTEL
Artificial Intelligence Fundamentals – IBM SkillsBuild
Network Fundamentals – Infosys Springboard
Unstop Talent Park Round 2 – Runner Up
TCS CodeVita Season 13 – Global Rank 2841

Education

Bachelor of Technology (B.Tech) in Information Technology	2023 - 2027
<i>Sanjivani College of Engineering, Kopergaon</i>	<i>CGPA: 8.5 / 10</i>
HSC – Maharashtra State Board	2023
<i>Shree Samarth Junior College</i>	<i>Percentage: 68%</i>
SSC – Maharashtra State Board	2021
<i>New High School, Ladgaon</i>	<i>Percentage: 89.40%</i>
